

Session 12 Assignment 1.

I ran into challenges configuring Flume. I was able to get it working but was unable to complete the assignment to stream Twitter feeds.

Below is screenshots showing that I was successful at streaming files from the local pc into HDFS.

```
[acadgild@localhost flume_sink]$ ls
test1 test2 test3
[acadgild@localhost flume_sink]$ ls
test1.COMPLETED test2.COMPLETED test3.COMPLETED
You have new mail in /var/spool/mail/acadgild
[acadgild@localhost flume_sink]$
```
